GE SmartCom

Multiroom audio and intercom system

Intelligently combining audio and entertainment

SmartCom from GE Security combines amenities that you want. Multiroom audio and intercom integrate into one system that is both attractive and easy to use. SmartCom provides:

- Integrated multiroom audio and intercom system
- Control of up to four audio sources, distributed to up to 16 independent zones
- Both audio and intercom over installed room speakers
- Room to room intercom with hands free answering

Communication and entertainment wherever you are

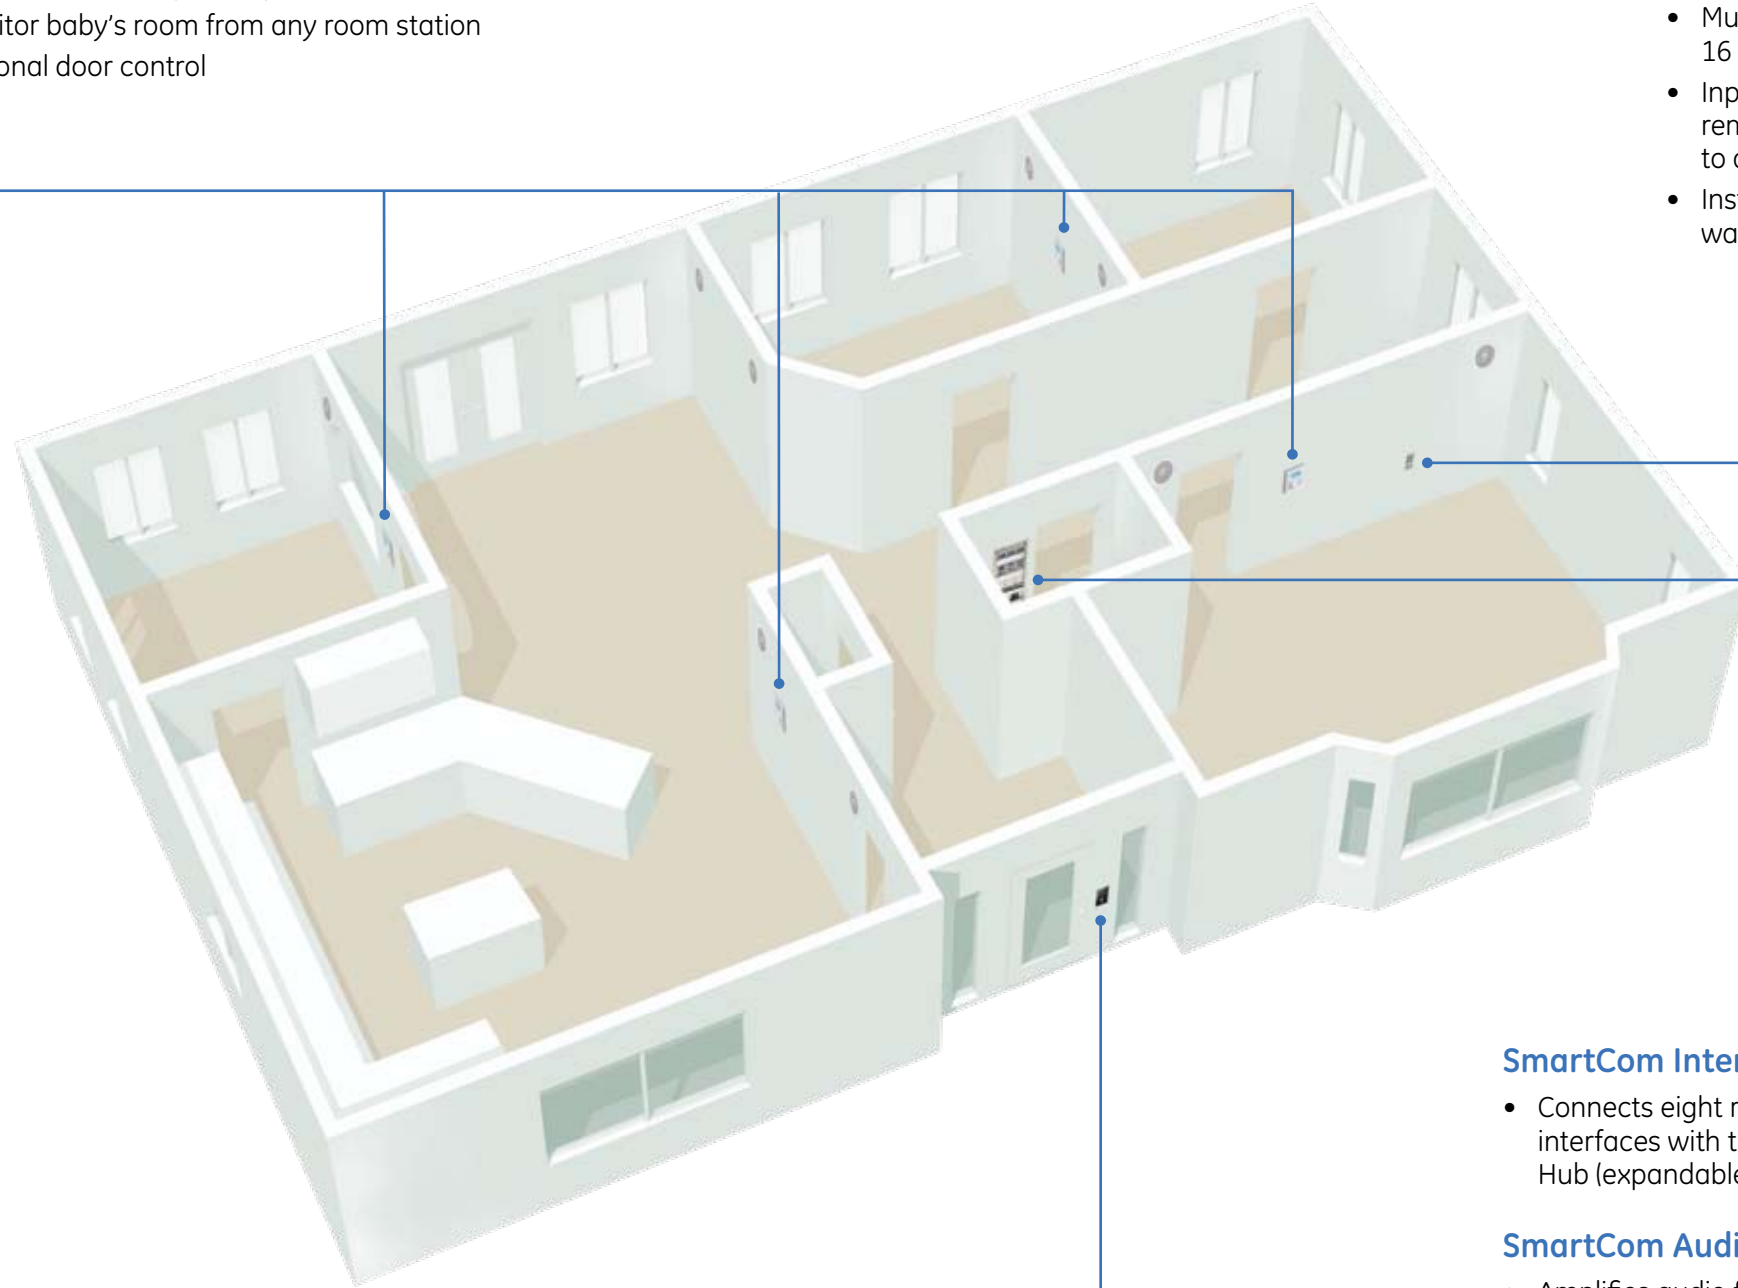

SmartCom Room Station – Intercom

- Communicate with entire house at once
- Call room to room privately with hands free answer
- Monitor baby's room from any room station
- Optional door control

SmartCom Room Station – Audio

- Each room has independent access to up to four audio sources
- Audio and Intercom are delivered over your installed room speakers

SmartCom Audio Input Module

- Distributes two audio sources using line-level audio inputs
- Music centrally amplified to up to 16 zones
- Input jack for IR emitter to pass remote control commands through to audio equipment
- Installs in a standard decorator style wall plate

SmartCom Door Station

- Press doorbell once to ring door bell
- Any Room Station can answer a door call
- Music in all zones is muted to hear door bell
- Weather resistant enclosure

SmartCom Intercom Hub

- Connects eight rooms of intercom and interfaces with the SmartCom Audio Hub (expandable to 16 rooms)

SmartCom Audio Hub

- Amplifies audio from up to four sources and distributes the audio to four zones in the home
- Four zone audio expansion amplifiers available — up to 16 zones
- SmartCom integrates with the GE Smart ConnectionCenter, which delivers the best quality broadband internet, video, audio, telephone, and security throughout your home

Customize to your home

The SmartCom Room Station integrates the control of both multiroom audio and intercom in one station that accents any home. Room Station's advanced design allows you to:

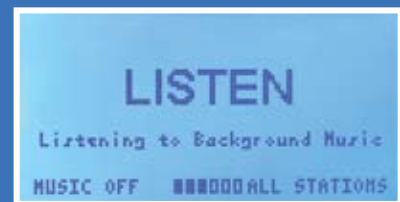

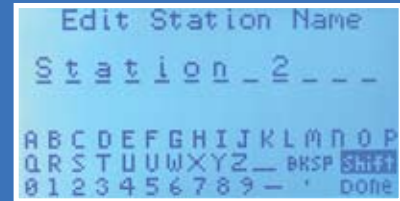

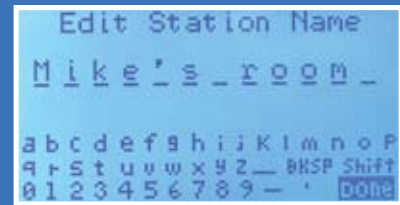

- Use the center dial to control the system volume or push to talk.
- Turn the dial to navigate through intuitive menus and push to select.
- Press easy-to-read function buttons for quick control.
- Edit the text on the screen to customize room titles or audio source names.
- Control more systems with fewer keypads on your wall.

Multiroom audio features

- Choose from four audio sources using the Room Station and installed speakers (not included) in up to 16 audio zones.
- Adjust the volume or mute your room without affecting the rest of the home.
- Pass the IR commands from your source remotes through any Room Station to your source equipment.

Intercom features

- SmartCom allows you to page the entire house from any room by simply pressing the center dial.
- Dial and select a single room and call that room privately, for up to 16 rooms.
- Answer "hands-free" when receiving a private call.
- Intercom calls override audio in all communicating rooms for a programmable amount of time.
- Place any Room Station in Monitor mode and listen to that room from any other room to hear infants or small children.
- Put any Room Station into Do Not Disturb Mode.
- Answer door calls from any SmartCom Room Station and release one door by simply pressing one button. (Requires electronic door strike hardware, sold separately.)
